OSCULATI

◢ IDENTITY

Osculati is the leading company in Italy and one among the most important companies in Europe in the marine accessory market, a safe and reliable reference point for professionals and pleasure boaters.

The company, founded in 1958 as the first marine accessory retailer in Milan, has turned into an international company and exclusive and official partner of some of the major shipyards in the world.

The third generation of the family, Alberto, Giorgio and Claudia Osculati is proud to support the Chairman Mario Osculati in the management of the company, with the help of the partners Francesco and Alessandro Gambogi.

Osculati's products can be found in thousands of shops and shipyards in 100 countries. The company has developed a professional sales force worldwide, with a turnover of € 112 million in 2023, more than 166 direct employees for a total available area of 21,000 sq.m.

◢ OUR NUMBERS

17,5
tons of goods we deliver every day

100
number of countries regularly supplied with our goods

22.000
products on our Master Catalogue

7.000
Osculati trademark products

166
direct employees

42.000.000 €
value of goods in our stock

96%
goods availability

1.000
new entries in our catalogue every year

**21.000 mq**
overall storage area

6.000
dealers worldwide

◢ DESIGN & ENGINEERING

The product development process often starts thanks to the innovative addition that has always characterized the Osculati family and the Chairman Mario Osculati in particular.

Inputs and suggestions from our customers, mainly shipyards, as well as from the sailors and boaters that work with us, trigger a process of constant development to create new solutions that fully meet any requirements.

Over 7000 articles developed by the company's Design & Engineering department where a team of engineers and designers is dedicated to the in-house development of CAD models and the implementation of prototypes and samples by means of 3D printers.
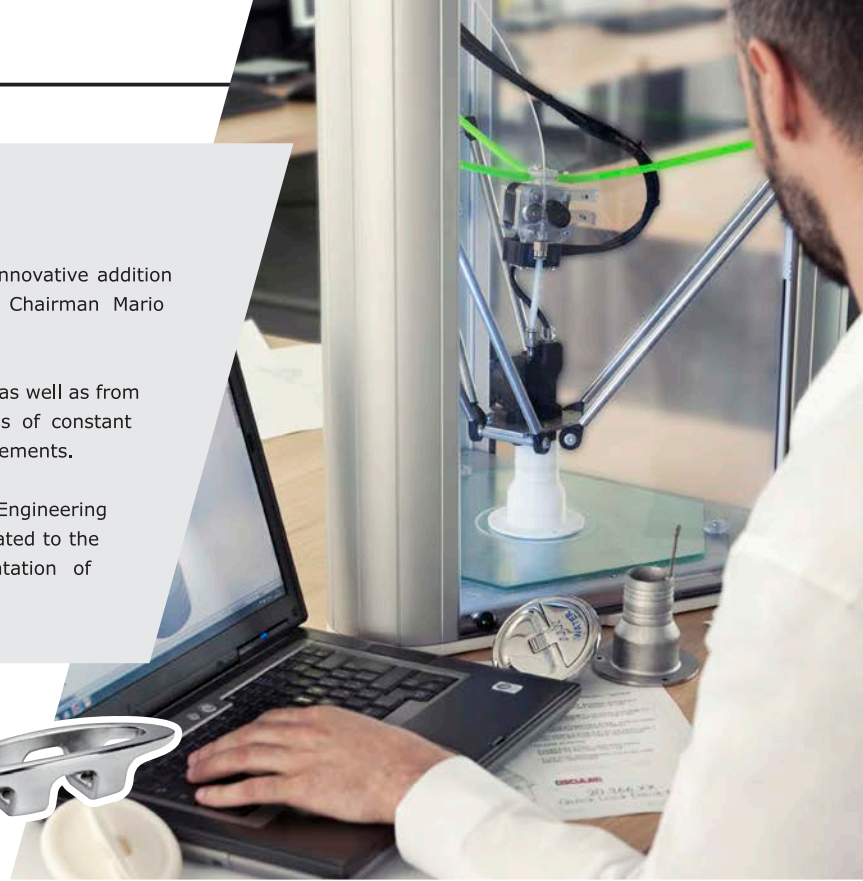

◢ QUALITY CONTROL

Our Integrated Quality Management Team consists of 5 internal inspectors who daily put products through different levels of quality tests according to their market category.

Our salt spray chamber and UV-chamber test both accelerated ageing due to tough marine environment and damage caused by sunlight.
Our in-house lab also tests all new products before they are placed on the market in order to offer increasingly higher quality standards.

We work with the best-known labs and institutions to perform accurate IP water-resistance tests, electrical tests as well as breaking loads tests.
• Over 70,000 annual tests
• 50 product certifications every year.
• Over 6,000 hours of salt spray chamber tests per year
• Over 5,000 hours of UV-chamber tests per year

◢ PRODUCTS TAILORED FOR THE SHIPYARDS

Thanks to our new laser printer the items on our catalogue can be tailored by engraving logo and name.
On demand we also make products that meet specific needs in order to develop the best solutions as for design and efficiency:
- Stainless steel items designed ex-novo by the specific needs of the customer.
- Plastic tanks (for freshwater, black water, diesel and petrol) tailored to the boat spaces.
- Hatches in the desired RAL colours.
We also take care of the type testing procedures and the documents needed.

◢ IN-HOUSE PRODUCTION

An in-house production, assembly and packaging department where by 30 specialised workers produce lights, ladders, gangways, battery switches and many other products.

This allows us the highest production process control by an ongoing monitoring of all production steps, production time reduction and flexibility to meet our customers' requirements.

Moreover thanks to a short supply chain we can be more competitive on the market.
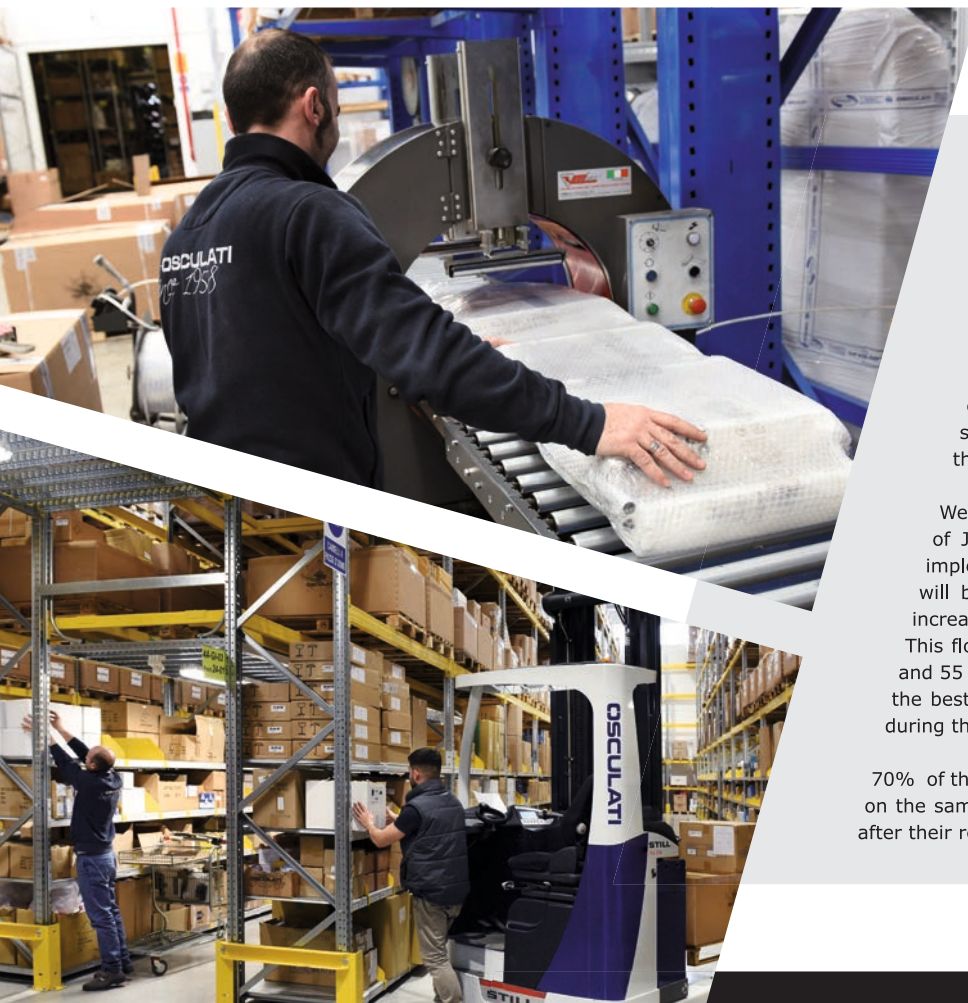

◢ LOGISTICS

Our marine equipment warehouse is the largest in Europe and one of the best-stocked worldwide offering over 22,000 items and goods availability exceeding 96%.

21,000 square metres, 42-million Euros worth goods in our depots, 17,5 tons of marine equipment shipped every day:
these are the figures of Osculati's logistics.

We pursue innovation and technological upgrading. As of January 2022, a new semi-automized area will be implemented where over 40% of the orders in progress will be dealt with aimed at offering our customers an increasingly faster and better service.
This flood of items is managed by 75 qualified warehouse and 55 logistics operators staff who work every day to offer the best standards in terms of efficiency, speed and safety during the preparation and shipment of goods to customers.

70% of the orders coming from the European Union is shipped on the same day while the remaining 25% is shipped the day after their reception.

#blueplanet

Osculati x **One Ocean Foundation**

One Ocean Foundation was established with the aim of accelerating solutions to ocean problems by inspiring international leaders, promoting a sustainable blue economy, and improving ocean literacy. Over the past four years, One Ocean Foundation has collaborated with high-level institutions, research centers, and universities.

Osculati is proud to have supported the research project for the repopulation of Posidonia "Blue Carbon Project", aimed at restoring the Posidonia oceanica meadow in the seabed of the Marine Protected Area of Isola di Bergeggi (Savona) in Liguria, thus contributing to the conservation of our precious marine ecosystem.

Here are some of the project achievements:

Quarterly site monitoring showed an excellent **survival rate of 81% for the transplanted seedlings**, one year after the intervention.

The mats used in the transplant are well anchored, and the seedlings successfully **resisted the strong winter storms.**

In April, we organized the **first educational activity,** involving about 40 students from the Bergeggi elementary school.

The documentary on the project was presented at the Riviera Film Festival and during **One Ocean Week Milano,** generating great interest.

The first scientific article on the Posidonia oceanica reforestation project **has been published,** documenting progress and challenges.

Cruiser Shore power

Marine plug and socket for 16A/32A - 230V shore power cord.
Simple and compact design for easy installation in any place of the cockpit
In compliance with the IEC 60309-5 European safety standards.

16A / 32A   **IP67**   **IEC 60309-5**

OSCULATI
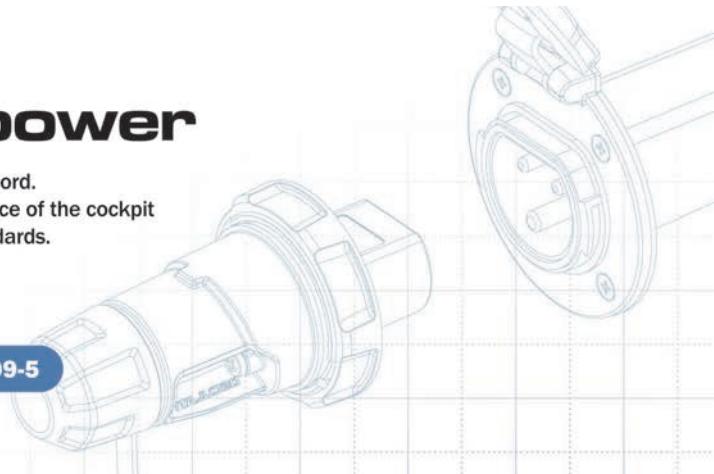

Cruiser 16A socket and plug

| 16A | IP67 | IEC 60309-5 |

Marine plug and socket for 16A - 230V shore power cord.
Made of PA6, fitted with high energy efficiency contacts and IP67 cover.
Plug designed for ergonomic grip, fastened to the boat socket through a rotating bezel. IP67 watertight closure. A rubber cap ensures IP44 tightness when unplugged.
Simple and compact design for easy installation in any corner of the cockpit
In compliance with the IEC 60309-5 European safety standards.

OSCULATI

Cruiser 32A plug and socket

| 32A | IP67 | IEC 60309-5 |

Nautical socket and plug for 32A - 230V shore power cable. Made of PA6, equipped with high energy efficiency contacts and an IP67 closure cap. The plug is designed to ensure an ergonomic grip, and the rotating ring allows it to be securely fastened to the boat's socket with an IP67 watertight seal, while the rubber cap ensures an IP44 seal when not connected. The clean design and compact dimensions allow for convenient installation of the socket anywhere in the cockpit. Compliant with European safety standards IEC 60309-5.

Retractable electric cable

| IP44 | AISI 316 | AUTOMATIC ROLLABLE |

Innovative electrical cable dock system. Hull hidden installation.
Thanks to an automatic retractable dispenser the electrical cable is drawn from a box and directly connected to the dock pillar.
To stow the cable, just unlock the seal and wait for the retractor to automatically rewind the extracted cable.
Once the cable is stowed away, the system disappears inside the hull into an elegant mirror-polished stainless steel box that ensures IP44 airtight seal.
The alignment between the winder and the bush can be oriented in any direction with a maximum recommended angle of 80°.
Available in two versions with different cable capacities of 16A and 32A.
Internal winder supplied with adjustable mounting brackets.

OSCULATI

Light rod with removable wireless base

| WIRELESS | USCG | LED | CARBON |

Removable 360° white light rod with 2NM visibility.

It features a special mounting base that allows operation via a wireless contact, prevents exposed metal contacts and ensures completely watertight seal.

The pole is secured at the base with a sturdy bayonet fitting. Once stowed, only a small flat disc with a stainless steel edge is visible on the hull.

OSCULATI
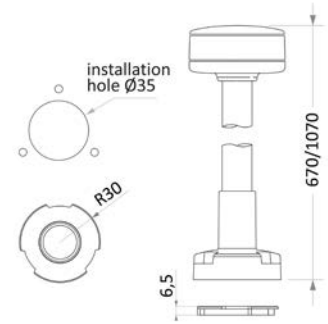

Stainless steel toggle fastener suitable for trunks and hatches

| FULLY FLUSH OPEN AND CLOSE |

Mirror-polished AISI 316 stainless steel lever closure, designed to fit various applications and ensure the closure of any hatch.

The locking pin with eccentric hole can be rotated to achieve the desired closing tension.

Once installed, the device has a flush design with ergonomic handle for easier use.

When open, the closing hook rotates at 180° and doesn't exceed the handle overall dimensions thus preventing to be hit by mistake.

It includes a PVC template for easier installation.

◄ Fully flush when not in use

① Use the template to hold the base in the open position, and mount the body with two screws.

② Insert the template on the front of the body.

③ Mark the hole for the latching pin.

④ Install the latching pin and turn it for the desired tension.

Waterfall skin fitting/drain well for transoms

| REGISTERED DESIGN | 13° INCLINATION | FAST INSTALLATION | ISO 9093 |

This system ensures the following advantages in a single product:
• Easy installation (1 operator only);
• Pre-assembly of the gate valve and hose holder at the workbench (threaded version);
• Locknut for positioning the gate valve in the desired position (threaded version);
• Drainage without unwanted siphon formation thanks to 13° inclination;
• Integrated non-return valve in case of reverse;
• Stainless steel finishing without visible screws.

Assembly sequence:
• Workbench pre-assembly of gate valve and hose holder (option to choose valve handle positioning);
• Insertion of the pre-assembled module from inside (optional pre-fixation with self-tapping screws from inside) - end of internal installation - ;
• Screw tightening of the final fixing nut from outside;
• Cutting of the exceeding part;
• Non-return valve plate mounting;
• Stainless steel finish clip mounting;

OSCULATI

Deluxe XL pull latch

| FLUSH | ERGONOMIC |

Code 38.511.10

Handle with wide ergonomic grip equipped with automatic pull-out system and snap lock.
For recess-fit mounting. Fitted with anti-vibration closing system.
Fixing with M4 studs, no visible screws.

OSCULATI

Magnetic door stop

| AISI 316 | FLUSH | PATENTED (UTILITY MODEL) |

Code 38.155.80

Magnetic door stop made up of two components:
Door block with 18° angled magnet and ground block with retractable plate.
The magnet lifts the plate when the door is approaching and the block is activated.
When not in use, the plate automatically returns to a flat, recessed, obstacle-free position.

Equipped with shock and anti-vibration gaskets and a set of 2 gaskets (2 mm and 4 mm) to adjust the ground block height as required.
For 4 to 10 mm floor height doors stops.

Bow roller + Trefoil® anchor with anti-water plate
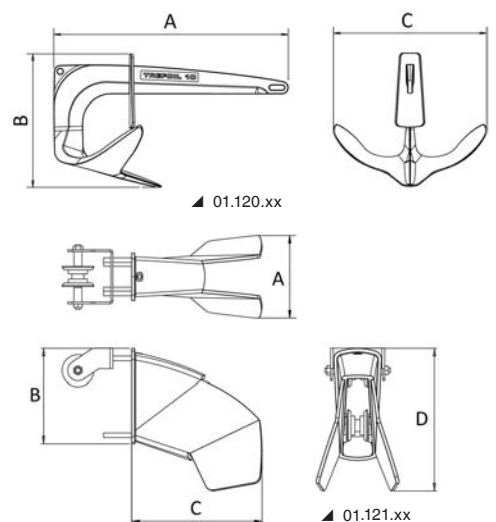

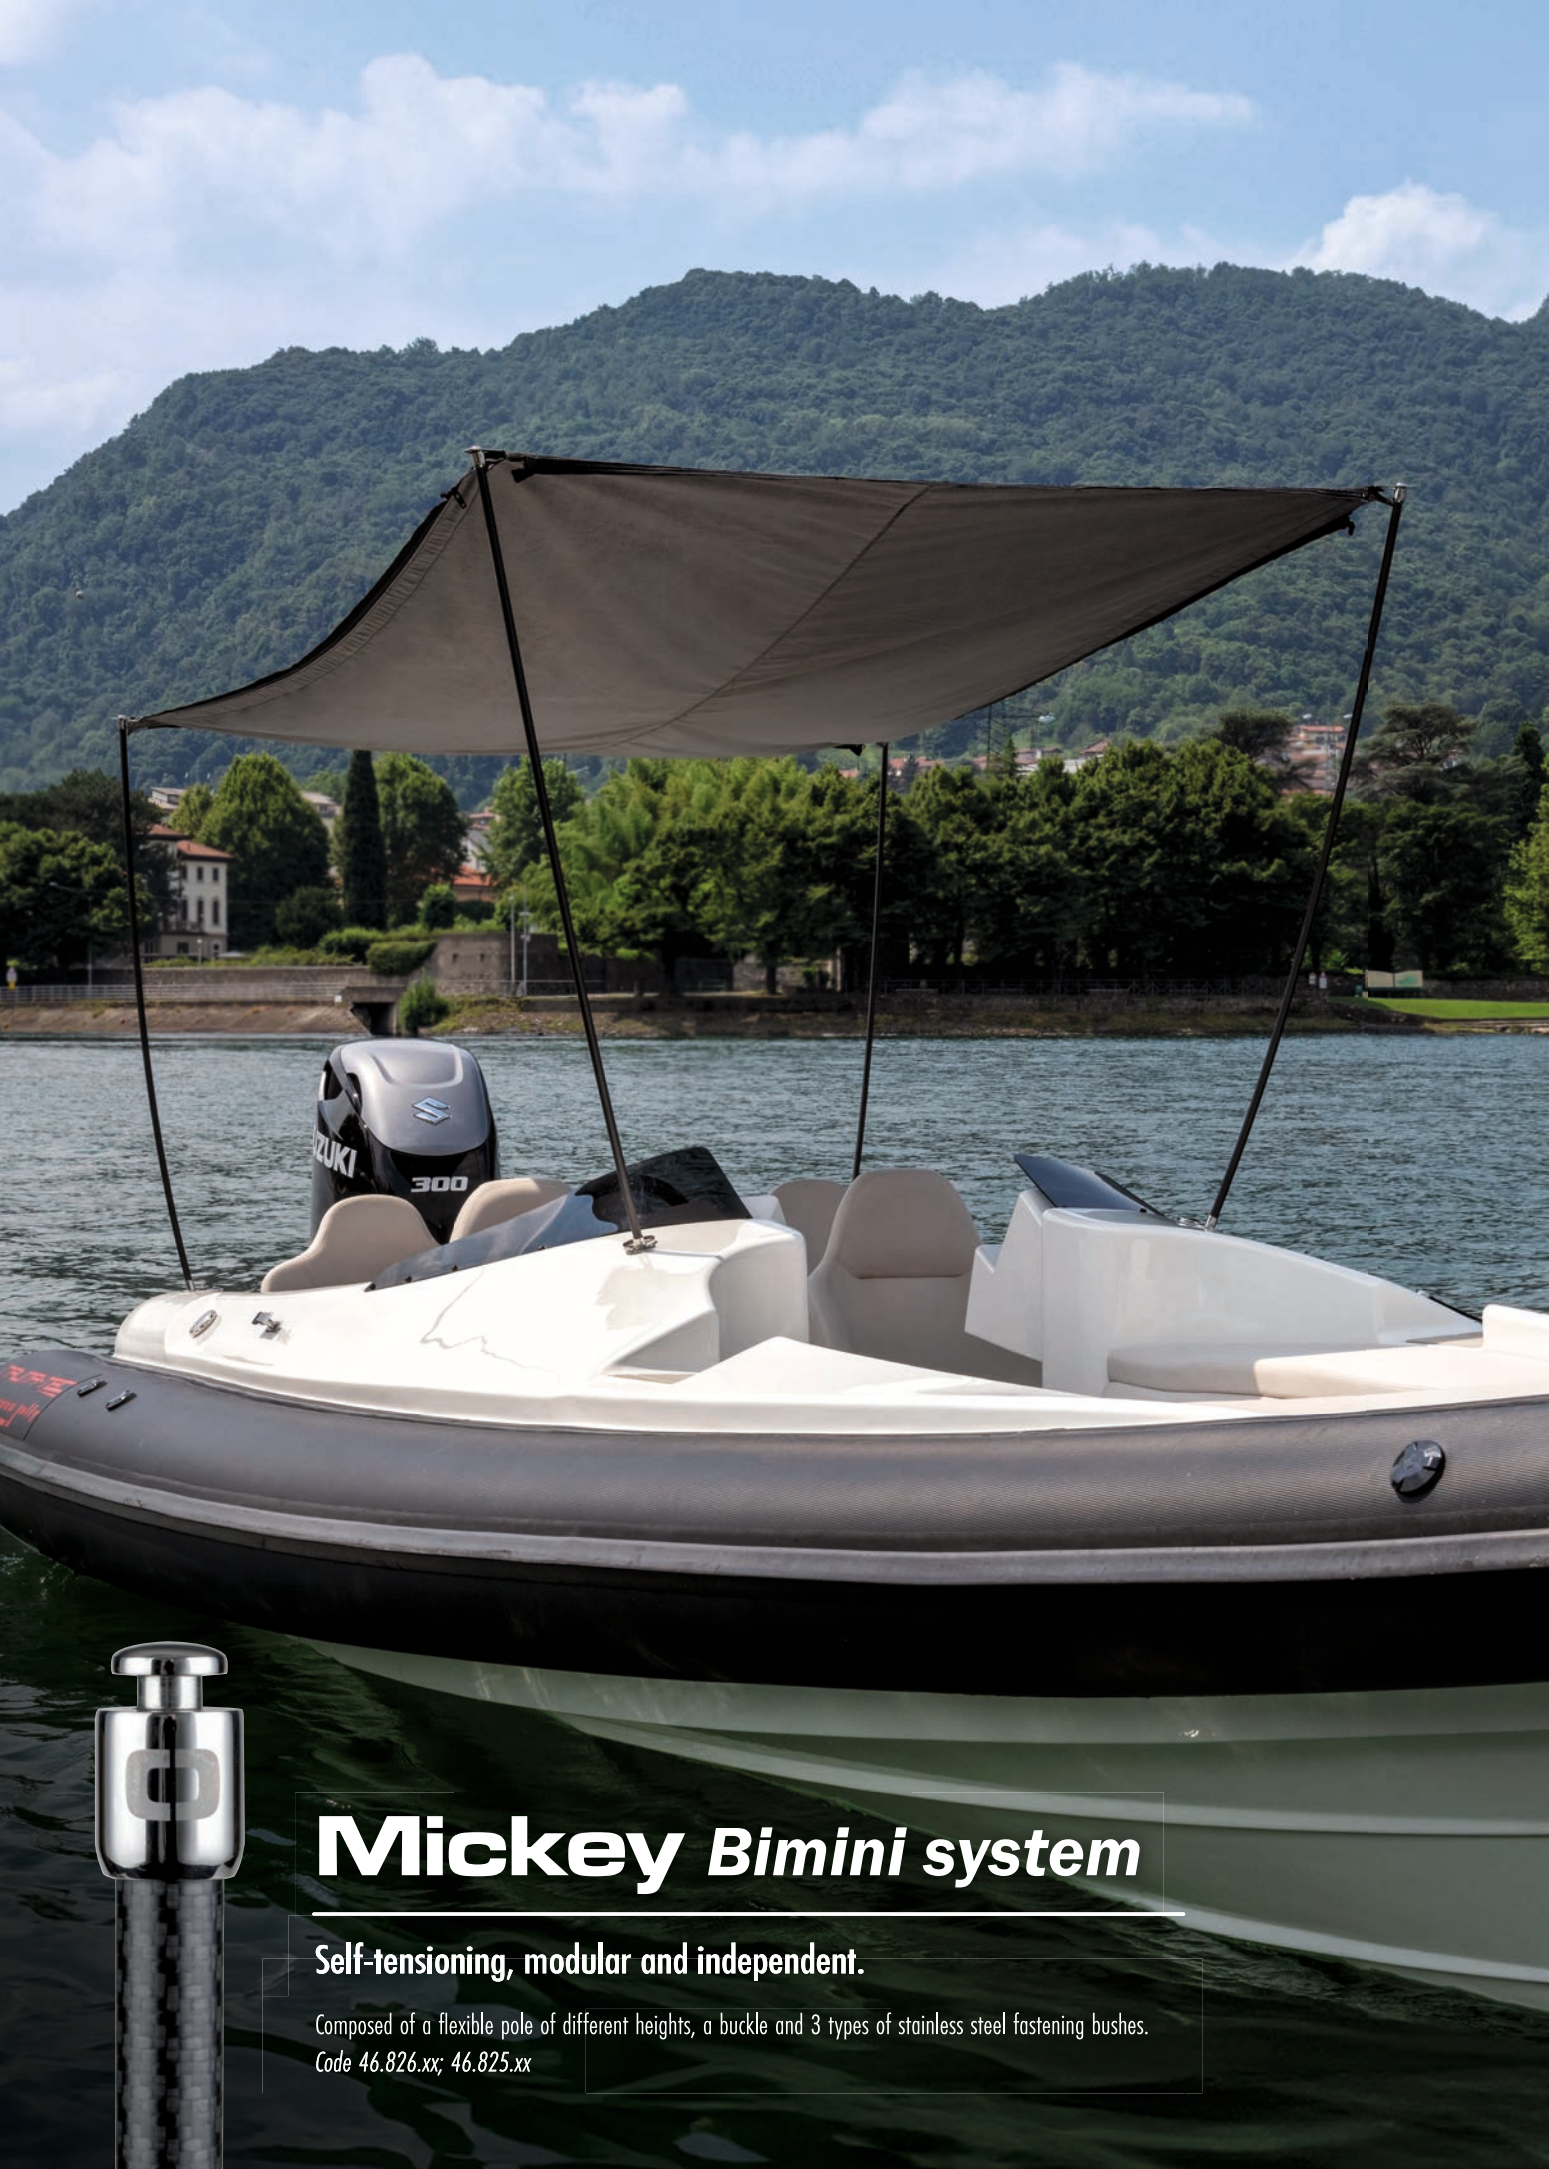

AISI 316   **SELF LAUNCHING**

Bow roller for anchor with coupling plate for perfect closure of the hull hole. This system makes the plate strike against the roller preventing water from leaking into the forepeak. The roller is designed to match the Trefoil anchor for a combination of high-level products in style and performance. The system can be easily installed by 4 studs behind the roller and is fitted with two sheaves for smooth sliding of the chain. Entirely made of mirror-polished AISI 316 stainless steel. It is recommended to install it on the chain by means of the Twist joint 01.738.01. Windlass ideal pull angle at 5° / 20° from the roller horizontal axis.

Mickey *Bimini system*

Self-tensioning, modular and independent.

Composed of a flexible pole of different heights, a buckle and 3 types of stainless steel fastening bushes.
Code 46.826.xx; 46.825.xx

Mickey self-tensioning, modular and independent Bimini system

OSCULATI

It can be used as sunshade or water protection and is UV-resistant. Simple to assemble, disassemble and store. It can be installed in many different ways.
The 15°-inclination basis are small and can be easily in different places of the deck depending on the needs and provide a wider coverage than traditional systems.
Much more convenient than the standard systems available on the market (canopy not included).

Mounting base on stainless steel pulpit Mickey system

OSCULATI

Code   46.825.10

Stainless steel bushing to be fixed on the pulpit at the point where it crosses the support arm (to prevent the bushing from rotating).
Adaptable to pulpits with diameters from 30 to 34 mm and support arm diameters from 25 to 28 mm.
Designed with a 15° angle towards the bow or stern and a 12° outward tilt of the vessel to create a self-tensioning system and maximise the size of the awning (screws included).
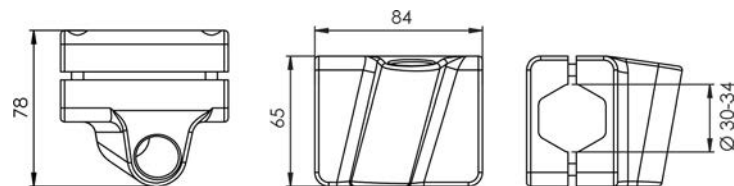

Bimini top with carbon tubes

OSCULATI

Bimini top modular system. High finish with mirror-polished swivel-lock bushings.

Recessed bushing for carbon pole with hinge cover

OSCULATI

Made of stainless steel with hasp & staple and locking gasket.
Water drainage preparation for pipe Ø 12 mm.
The closure discreetly protects the glass when not in use.
It is possible to customize the cap with a logo upon request.

13.273.42	12/24	36x5 W	129.6	2197/8796	RGBW	175x82x17

A) Models with fixed white or blue light (excluding RGBW)
Ignition through ON-OFF switch

B) RGBW Models (red/green/blue/white light)
Ignition through 4 ON-OFF switches for each color or through controller **13.237.50** via smartphone bluetooth.
The controller **13.237.50** allows:
- select and mix the four basic colors red/green/blue/white;
- to adjust light intensity;
- to rhythm the light following the onboard music via Bluetooth.
The controller has 4 output cables for 4 colors. The white color can also be achieved by mixing the three colors red/green/blue. The cable dedicated to the white color can thus be freed up and used to insert into the controller the cockpit courtesy lights or other LED lights (up to a maximum of 120 W) that can be controlled, adjusted, timed, etc., via Bluetooth with a smartphone.
The controller supports up to 360 W at 12 Volts. If the total installed power is less than 360 Watts, the system must be completed with an amplifier **13.273.55** for every additional 360 W.
In case of a 24 V power supply system, and only for RGBW lights, a Vage reducer (see **Victron** or similar) from 24V to 12V must be installed upstream (in case of a AC 220/110V - 12V system) equal at least to the installed power. Multiple voltage reducers coupled to the light groups are also suitable (see electrical diagram).

Recessed magnetic support with SCANSTRUT Aura wireless charging - 10 W
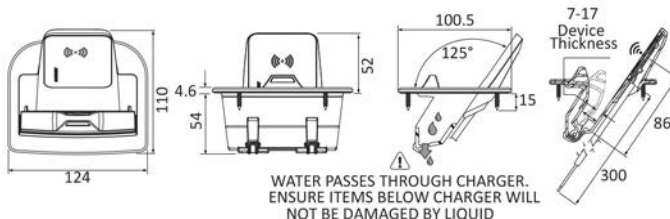

SCANSTRUT

IPX6

Built-in wireless charger, designed to withstand the toughest weather conditions.
This device charges the phone wirelessly and also keeps it securely in place.
Your smartphone will effortlessly magnetically lock into the optimal charging position.
Allows phone charging in outdoor environments. No cable required.

- Waterproof Rating: IPX6.
- 10W fast charging.
- Input Voltage Range: 12/24V.
- It fits any boat.
- Instantly start wireless charging, no connection required.

Fixed FIREBOY fire extinguishers with clean agent and manual/automatic activation

USCG

The MA Series fire extinguishers provide optimal protection for engine rooms and motor compartments up to 51 cubic meters. This pre-engineered system ensures a total flooding, representing the safest solution to combat fires in critical environments.
- Automatic activation at 175°F (79°C): in case of emergency, the extinguisher automatically activates at a preset temperature, with the option of manual activation for additional control.
- FK-5-1-12: clean extinguishing agent, ideal for protecting delicate equipment without causing collateral damage.
- Locking lever: increases safety during cable removal or installation.
- Powder coated mounting support: includes a sturdy mounting bracket and a 2-inch LED display for immediate visual control.
- Approved by USCG (United States Coast Guard) and ISO RINA.

FIREBOY ESC series automatic engine shutdown systems

Every system in the FIREBOY ESC series includes an integrated audible alarm, charge/discharge lights, and an override switch to restart or control the automatic shutdown. They are equipped with a water-resistant display.

The ESC Series offers:
- Enclosure ISO 54: robust protection with fuses and internal terminals.
- Heyco Connectors: for a reliable cable connection.
- Variety of models with 6, 8, and 10 circuits.
- Gold-plated 2-amp relays (operational from 10 mA to 2 amps) and 15-amp relays (operational from 100 mA to 20 amps).
- Multiple voltage 9-12-24-32V DC.

Functions enabled hrough the control units depending on the boat configuration:
-Turn off the engines.
-Turn off the generator.
-Turn off the blower.
-Turn off power supply pumps.
-Close shutters.
-Turn on alarms.
-Various other functions via the control unit relays.

Settable electric touch panel with CAN-BUS controller

MODULAR   **BACKLIGHT**   **AUTOMATIC FUSE**

Modular touch glass panel with backlit symbols. It comes with 40 stickers indicating the different functions to be applied under the glass so that the surface is smooth and gives a print-like effect.

Every switch can be set in 3 different modes:

- Traditional ON-OFF: press a key to activate/deactivate the relating function.
E.g.: COCKPIT LIGHTS

- Temporary (ON)-OFF: this function is active only while the key is pressed.
Ex. 1: switch – HORN
Ex. 2: switches – WINDLASS UP/DOWN

- ALTERNATE ON-OFF: two keys can be set to activate a function and deactivate another one and vice versa.
E.g.: BILGE PUMP IN MANUAL/AUTOMATIC MODE

The keys are backlit in yellow when in standard mode, in blue when the function is active and in red in case of short circuit.
The panels are designed to be modular: if placed side by side in vertical and/or horizontal position, they look like a single built-in panel with 4, 6, 8 (4 + 4), 10 (6+4), 12 (6 + 6) switches and so on.
The connection between the control unit and the panel is pre-wired with a quick connector. Cable length 1.5m with the option to add an extension of an additional 1.5m.

The MOSFET module is a protection against overloads and voltage inversions. The CAN-BUS is fitted with 4 or 6 thermal fuses that activate in case of short circuit (function key lit in red).
The fuse can be reset automatically once the short circuit has been solved and the key is then lit in yellow

CE certified panels, protection rating IP67.

LEWMAR Ultra Low Profile Hatch

It clears your view by minimising clutter.

New ultra-low hatch that combines practicality, aesthetics, and ease of installation.

Sturdy and light frame. The hatch is placed 10 mm above the deck, turning it into a flush setup.

The cut-out dimensions align with those of Low Profile, Medium Profile, and Ocean series; this ensures easy retrofitting without modifications and additional deck drainage.

The lower frame features a silver anodised finish that ensures corrosion resistance in the harshest marine conditions.

The rotating collar helps reduce "sudden jerks"
End pin to reduce rod rotation
90° lockable rotation
High resistance, UV stabilized, engineered polymer construction
Isolated fastening system to prevent corrosion caused by different metals
1 HEXX base included
Always use a cord on the rod

Spinning reels   Bait caster reels
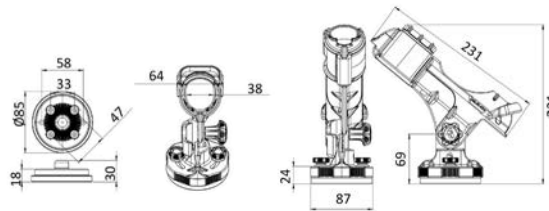

RAILBLAZA Gear Hub Multifunction Box

Gear Hub allows for stowing, transporting, organizing, and protecting everything needed for an excellent fishing session.
Infinite possibilities for use and customization thanks to adaptable Railblaza accessories.
Suitable for shore fishing, beach, kayak, canoe or boat fishing.
- 4 integrated rod holders in the corners.
- It contains 8 Plano 3600 or similar.
- 9 Guide Tracks prepared for Railblaza accessories.
- Multiple attachment and anchoring points.
- Integrated handles.
- Non-slip rubber feet.
- Entirely stainless hardware.
- Hinged lid with locking closure.

Kayak and Canoe Carts C-TUG® by RAILBLAZA®

RAILBLAZA Kiwi C-TUG Cart with Wheels

C-TUG is a robust cart suitable for all terrains. Market-leading design.
No tools required. To be assembled and disassembled in seconds. Sized to be stowed in kayak hatches.
• It disassembles in a few seconds.
• Fits inside hatches.
• Hull rubber padding.
• Tool-free assembly.
• Kiwi puncture-proof wheels with rubber tread.
• Strap 2.8 m with aluminium buckle.
• Adjustable stand.
• 5 years warranty.

Code	Cod. Railblaza	kg	Static load capacity Kg
47.341.01	50-001-71	4.3	120
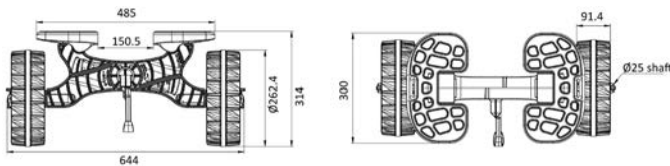

RAILBLAZA C-TUG R Cart

C-Tug R is the evolution of the market leader C-Tug.
Thanks to adjustable support rails, it adapts to all hulls ensuring maximum balance during towing.

• It disassembles in a few seconds.
• Stowed inside hatches.
• 20" (500 mm) support rails with non-slip rubber bearings.
• Made of sturdy reinforced polymer.
• Stainless steel reinforced axles.
• Kiwi puncture-proof wheels or SandTraKz for sandy or smooth surfaces (ensure high glide and ease of transport).
• Strap 2.8 m with aluminium buckle.
• Adjustable stand.
• 5 years warranty.

VICTRON battery chargers and devices

victron energy

VICTRON TG microprocessor battery charger

3-stage IUOU charge with microprocessor that perfectly adapts the charge to the battery requirements (very important function in case of sealed batteries). Two isolated outlets, the second (4 A) dedicated to the starting batteries. Battery temperature compensation automatic system (it extends the life of sealed batteries).
Technical data: 180/264 VAC - 180/400 VDC - 45/65 Hz power supply; Aluminium housing; Internal temperature sensors + battery temperature sensor; Forced ventilation; Protections against short circuit, polarity inversion, overheating.

Code	Model	Type	V output/ input	Max charging current A	Number of outputs	Recom-mended for batteries A·h	|⟷|mm	kg

Maxi submersible bilge pump

Compliant with CE/ISO 8846-8849 and RoHS standards.
Silent, with stainless steel shaft and valve that prevents water backflow and blockage due to air pockets
Removable filter for easy cleaning.
The new quick connection system allows the motor to be extracted without disconnecting the base and hydraulic connections.
Automatable through any automatic switch (at least 20A).

High-visibility floating mooring lines with reflective strand

REFLECTIVE STRAP   **FLOATING**

Polypropylene lines suitable for mooring in bays and with lines on the ground. Being floating, they make it easy to manage the boat and haul it onshore.
Slightly elastic, acting as mooring shock absorbers.
The strand being yellow and reflective is highly visible at night to bathers and other boats.

Pearl stainless steel lever latch

**OSCULATI**

AISI 316   **MADE IN ITALY**   **PATENT PENDING**

The operating mechanism is enclosed within the main casing, thus presenting an impeccable **aesthetic** result. Features an intermediate elastic system that allows for a consistently usable and pleasant trigger tension, capable of compensating for any variations that may occur during work. It is entirely made of stainless steel **AISI 316**, mirror-polished finish on the outside and a bright finish on the inside.
For the latch fastening, what follows is required:
- 2 M4 countersunk screws for the base plate,
- 2 M5 rounded head screws for the hooking tooth.

Thermoelectric cooler 12V

This thermoelectric cooler is a state-of-the-art cooling device designed to ensure the ideal temperature for wine bottles and other beverages up to a diameter of 92 mm.
A thermoelectric cooling system made up of copper tubes and a heat sink ensures even temperature distribution and optimal performance.
The cooler is equipped with a modern touch control panel and display that makes it simple and intuitive to manage temperature setting.
It comes with a plug and cigarette lighter adapter.

Duralac Green

Renewed version of the original Duralac, it is a plastic insulator and sealant used to prevent galvanic corrosion at the contact point between two different metals, such as: aluminum toerail fixed with stainless steel screws, windlasses in aluminum or brass fixed with stainless steel bolts, stainless steel accessories for the mast fixed on the mast itself (in aluminum) with rivets or screws, cleats secured with different metal studs. Duralac is a yellow, chromate-free, resistant and flexible paste, to be fitted in between the two metals that are jointed together; application with brush; do not dilute.

MARLIN Yacht Paints

MARLIN Velox Super antifouling paint

Specific product for submersed metal parts such as propellers, stern drives, shaft lines, etc.
It does not degrade with galvanic currents, which are the major cause of paint peeling.
Velox Super is the evolution of the well-known Velox Plus and is approved in compliance with BPR directive, also for DIY use (in Italy).
The addition of new additives and TEFLON have improved the adhesion properties for better smoothness and easier cleaning.

MARLIN Yacht Paints

MARLIN Flexy antifouling paint

Flexible antifouling paint suitable for the protection of inflatable boat tubes (neoprene, hypalon, pvc, vinyl leather, etc.).
It can also be applied on fiberglass hard keels.
No primer needed on either fabric or fiberglass.
Excellent adhesion, effectiveness and flexibility.

Code	Colour	Package l

65.897.02	250 ml Kit

MARLIN Eco Sil antifouling paint for echo sounder transducers

Biocide-free **transparent foul-release** antifouling paint. It provides strong adhesion on plastic, does not interfere with the echosounder signal.
The solvents in the paint do not attack either the plastic or the seals.
Any vegetation growth will be removed by the motion of the boat or through light cleaning using a sponge.
A small brush for application is included.

SCOUT KS-42 VHF Antenna

Code   **29.997.00**

Antenna in **ice white fiberglass** with UV filter, filled with **waterproof polyurethane**, high strength, 1.5 mm thickness. Length 2.40 m, standard attachment 1" x 14 threads in chrome-plated brass. **Gain 3 dB** and maximum input power 50 W. Complete with 5-m of RG-58 cable and PL-259 connector. Ideal for medium and large boats.

SCOUT KS-7B fiberglass CB Antenna

Code   **29.910.00**

Body in **ice white fiberglass** with UV filter, 1.4 mm thick, entirely filled with **waterproof polyurethane**. Complete with 5-m of RG-58 coaxial cable and PL-259 connector. Length 1.5 m, standard attachment 1" x 14 threads. Maximum input power 10 W.

SCANSTRUT aluminium Power Tower 150 mm for Starlink

Designed to install Starlink antennas on the roof, T-top, flybridge, or boat radar arch.
This Power Tower ensures obstacle removal and positions your Starlink at an ideal angle of 8° for optimal connectivity. Designed for the marine environment, it is custom-made to fit Starlink High-Performance systems.
Pre-drilled mounting holes allow for secure attachment directly to the tower. The integrated Scanstrut cable seal ensures watertight installation. No need to remove Starlink connectors during installation. Finishing complies with the exclusive marine paint system.
Made of premium quality aluminum suitable for the marine environment.

Rubber stuffing box

Long lasting insulation from water seepage, low maintenance required if correctly treated.
Made of a special type of rubber resistant to salt water and lubricating grease.
The product is supplied with an AISI316 stainless steel clamp and specific lubricant for shaft line.
Operation of the stuffing box is usually under the waterline; lubrication and cooling by water. In case of operation above or on the waterline, an external water cooling source is needed.

Version A: brass hose adaptor for external lubrication by water (if not used, a brass closing cap is supplied) + greasing aperture with brass cap.
Version B: no hose adaptor and greasing aperture.

The kit includes: stuffing box + specific lubricant tube + instructions.
