OSCULATI

U.S. line

WHAT WILL YOU FIND IN THIS CATALOGUE?

...AND MUCH MORE!

WHO IS OSCULATI?

Osculati is the leading company in Italy and Europe for nautical accessories, since 1958 a reference point for professionals and pleasure boaters.

Osculati is a family company, with the third generation, Alberto, Giorgio and Claudia Osculati proudly supporting the Chairman Mario Osculati in the management of the company.
The company actively supplies a customer base spread in 100 countries in 5 continents, and is safe and reliable partner of all the main shipyards in Europe and worldwide.
Osculati is an AEO-F certified company (Authorized Economic Operator): the certification, which is comparable to the **C-TPAT** in USA, attests the reliability of the international supply chain management and allows **simplified and faster customs controls**.

OUR NUMBERS:

- The largest availability of accessories in Europe

- 42.000.000 € value of goods in our stock

- 96% goods availability

- In-house product design

- 7.000 Osculati trademark products

- Over 65.000 annual product quality tests

- 600 orders processed every day

- 17,5 tons of goods delivered every day

- Goods shipped regularly to 100 countries

- 22.000 products on our Master Catalogue

- 166 direct employees

- 1.000 new entries in our catalogue every year

- 21.000 mq overall storage area

- 6.000 dealers worldwide

- Over 1100 catalog pages

DESIGN & ENGINEERING

The product development process often starts thanks to the innovative addition that has always characterized the Osculati family and the Chairman Mario Osculati in particular.

Inputs and suggestions from our customers trigger a process of constant development to create new solutions that fully meet any requirements.

Over 7000 articles developed by the company's Design & Engineering department where a team of engineers and designers is dedicated to the in-house development of CAD models and the implementation of prototypes and samples by means of 3D printers.

3D AVAILABLE ON EVERY PRODUCT

CUSTOM PRODUCTS

Thanks to our new laser printer the items on our catalogue can be tailored by engraving logo and name.

On demand we also make products that meet specific needs in order to develop the best solutions as for design and efficiency:
• Stainless steel items designed ex-novo by the specific needs of the customer.
• Plastic tanks (for freshwater, black water, diesel and petrol) tailored to the boat spaces.
• Hatches in the desired RAL colours.

We also take care of the type testing procedures and the documents needed.

LASER PRINTER

TANKS & HATCHES

IN-HOUSE PRODUCTION

An in-house production, assembly and packaging department where by 30 specialised workers produce lights, ladders, gangways, battery switches and many other products.

This allows us the highest production process control by an ongoing monitoring of all production steps, production time reduction and flexibility to meet our customers' requirements.

Moreover thanks to a short supply chain we can be more competitive on the market.

QUALITY CONTROL

Our Integrated Quality Management Team consists of 6 internal inspectors who daily put products through different levels of quality tests according to their market category.

Our salt spray chamber and UV-chamber test both accelerated ageing due to tough marine environment and damage caused by sunlight.
Our in-house lab also tests all new products before they are placed on the market in order to offer increasingly higher quality standards.

We work with the best-known labs and institutions to perform accurate IP water-resistance tests, electrical tests as well as breaking loads tests.
• Over 65,000 annual tests
• 50 product certifications every year.
• Over 5,000 hours of salt spray chamber tests per year
• Over 1,000 hours of UV-chamber tests per year

LOGISTICS

Our marine equipment warehouse is the largest in Europe and one of the best-stocked worldwide offering over 22,000 items and goods availability exceeding 96%.

21,000 square metres, 42.5-million Euros worth goods in our depots, 17.5 tons of marine equipment shipped every day: these are the figures of Osculati's logistics.

We pursue innovation and technological upgrading. As of January 2022, a new semi-automized area has been implemented where over 40% of the orders in progress will be dealt with aimed at offering our customers an increasingly faster and better service.

This flood of items is managed by 75 qualified warehouse staff who work every day to offer the best standards in terms of efficiency, speed and safety during the preparation and shipment of goods to customers.

70% of the orders coming from the European Union is shipped on the same day while the remaining 25% is shipped the day after their reception.

RETAIL RANGE

Osculati offers a wide range of products whose packaging is tailored to the end user's needs. Each single detail is designed to be instantly recognizable and enhance the shop image and the product features.

Packaging

Packaging is one of the smartest media and makes a product immediately recognizable on the shelf: the user will better appreciate its features and this is why most of OSCULATI-brand products come in a high-quality item-oriented packaging.

Every OSCULATI package shows the pictures of the product, its technical data in several languages, its item code and bar code. A colour band stands for the category the product belongs to for a fast identification on the items on display.

SUSTAINABILITY

Osculati has always worked alongside organisations and associations committed to achieving the 2030 Agenda goals, both through its financial contributions and by providing its expertise.

OSCULATI *for*
UN **AGENDA 2030**

Osculati has chosen to offset emissions from its transport vehicles by adhering to the Blue Valley project.
By means of the project, Osculati has offset 83 tonnes of CO_2 emissions in 2022.

Blue Valley
bio fish & carbon credits

For more than ten years Osculati has been using exclusively 100% carbon offset renewable energy, while its logistics warehouse is powered by a geothermal and solar energy system.

No more chills, just chill out.

Saturn series with built-in mixer

Rotable head with temperature control and on-off button

Saturn shower with hot/cold water built-in mixer

REGISTERED DESIGN   **HOT & COLD**

Shower with built-in mixer. Flat hidden design. Horizontal or vertical mounting.
Shower housing fitted with anti-vibration washer.

Hot and cold water can be **adjusted** by rotating the shower body while the flow is adjusted by touching a push lock button that blocks the water jet and prevents waste.
The built-in mixer precisely adjusts the temperature and store data between uses.]

vertical bow

Integrated design
Bow-roller/anchor

Heavy duty

Self-launching

### Bow roller + Trefoil® anchor with anti-water plate

AISI 316   **SELF LAUNCHING**

Bow roller fitted with an anchor having a coupling plate that closes perfectly the hole on the hull. This system makes the plate strike against the roller preventing water from leaking into the forepeak. The roller is designed to match the Trefoil anchor for a combination of high-level products in style and performance.

The system can be easily installed by 4 studs behind the roller and is fitted with two sheaves for smooth sliding of the chain.
Made from 100% mirror-polished AISI316 stainless steel.

It is recommended to install it on the chain by means of the Twist joint 01.738.01.
Windlass ideal pull angle at 5° / 20° from the roller horizontal axis.

Mr. Fantastic extendable roller

Ideal for vertical bow.
From 7,5 to 30 kg anchor.

Mr. Fantastic extendable roller

EXTENDABLE   **IDEAL FOR VERTICAL BOW**   **SELF LAUNCHING**

Made of mirror-polished stainless steel, ideal for Trefoil or similar anchors.
Fitted with an innovative gas spring system that keeps the anchor off the bow before being cast.

At the same time, a tilting movement lets the anchor drop automatically while keeping it at a safety distance from the bow.
The roller has a **22-cm extension stroke** and is mainly suitable for vertical bows.

Its lightweight and sports shape is well-suited to the hull and its steel frame is designed to withstand high loads.

Twist anchor swivelling connector

AISI 316   **PATENT**

Made of mirror-polished AISI316 stainless steel.
With the latest asymmetric anchors (Bruce, Delta, Trefoil® etc.), when the anchor is raised, it most probably turns the wrong side. **The Twist swivelling connector turns the anchor correctly and it reeves into the roller or hawsehole**.
A shackle connects the fixed eye to the anchor.

Crab fairlead with cam cleat

REGISTERED DESIGN	TEMPORARY LOCK	IIDEAL WITH CAPSTANS AND WINCH

Mirror-polished AISI316 stainless steel fairlead with lever instant blocking system.
Depending on the diameter, stiffness of the line and part line, the fairlead holds the line by means of its blocking system. In case of larger diameters (28 mm and over) or in unfavorable situations, keep the side lever pressed to cleat the line as long as it's needed to tie it onto the cleat.
Simple and innovative, this system makes mooring faster and safer, suitable also for beginners helping the skipper. For line 20 to 26 mm (independent block) and 26/30 mm (manual block).
Hidden screws, easy to install on the deck by means of two high-strength 8-mm Ø studs.
